## What is Domestic Abuse?

Domestic abuse is an incident, or pattern of incidents, of **controlling, coercive, threatening, degrading or violent behaviour**, used by one person (perpetrator) to maintain control over another (survivor) in an intimate relationship.

The majority of domestic abuse cases are between current or ex-partners, but can also exist between family members or carers.

**Domestic abuse can affect anyone, but it disproportionately affects women.**

Domestic abuse can include but is not limited to the following:

- Coercive control
- Psychological/emotional abuse
- Physical/sexual abuse
- Financial/economical abuse
- Harassment and stalking
- Online/digital abuse

**Any woman can experience domestic abuse** regardless of race, ethnic or religious group, class, disability or lifestyle. Domestic abuse can also take place in lesbian, gay, bisexual and transgender relationships and can involve other family members and even extend to the mistreatment of pets.
