### **What's been happening so far?**

Updated proposals were shared in May 2025 which, in turn, followed months of planning to capture as many suggestions as possible from a major consultation exercise carried out in 2022.

Residents, businesses and community groups took part, and all these comments were taken into consideration as the project team put together a plan to deliver a range of improvements to make the town centre more attractive.

Construction works are now ready to commence.

## **Bulwell Bogs**

## What's happening next?

Over the coming weeks on site works to Main Street and the market area will commence along with commencing works to the main Bogs area.

**Bulwell Bogs New Splash Pad**

**The Bogs** area will be fully refreshed with a new planting and landscape design, including a high-quality play offer to cater for all ages. It will see renewal and expansion of the splash park and introduction of a refreshments kiosk with toilet and changing facilities to make the park a great place to visit

**Market place:** Existing market equipment will be replaced with new stalls, along with better access to electrical power on site, supporting both new and existing vendors

**Bus station public toilets:** The existing bus station toilets will be rebuilt and completed modernised

**Wider public realm** Paving will be renewed across the pedestrianised areas of the town centre along with new seating and landscaping. Connections will be improved between the Market Place and the Bogs area to bring these separate parts of the town centre together

## Contact...

For further information on the project or if you have any concerns regarding site activities please contact:

Willmott Dixon at our Site office in Gilead Street Car Park.
