

The green bin waste is taken away by the truck.

The truck takes the waste to the Eastcroft incinerator.

The green bin waste is taken away by the truck.

The truck takes the waste to the Eastcroft incinerator.

The waste is burned in the incinerator at a temperature of  $850^{\circ}\text{C}$ .

The heat turns water into steam, which is used to turn a turbine.

The waste is burned in the incinerator at a temperature of  $850^{\circ}\text{C}$ .

The heat turns water into steam, which is used to turn a turbine.

As the turbine spins, it generates electricity.

The electricity is sent to power lots of homes and buildings in Nottingham.
